### 3. HAZARD IDENTIFICATION

**EC classification :**

See paragraph 15

**Most important hazards :**

### 4. FIRST AID MEASURES

**Inhalation :** Move the victim to fresh air. Put person in half sitting position and let rest. In extreme cases seek medical advice.

**Skin contact :** Flush with plenty of water. Remove contaminated clothing.

**Eye contact :** Rinse eyes thoroughly with water until irritation stops. In all cases seek medical advice.

**Ingestion :** Rinse mouth with plenty of water. Give victim considerable amounts of water to drink, do not give anything to drink to an unconscious person. In extreme cases seek medical advice.

**Other :** Allergic skin reaction may develop if exposed often and for long periods of time.

**Advice to physician :**

### 5. FIRE-FIGHTING MEASURES

**Suitable extinguishing media** Only use extinguishing media which are compatible with the surrounding materials.

Water, waterspray, Carbon dioxide, dry powder, foam, sand

**Unsuitable extinguishing media :** All extinguishing media are allowed.

**Special exposure hazards :** When product is involved in a fire, toxic fumes and smoke

may be generated. Do not breathe these fumes

**Hazardous decomposition/combustion products** :Formation of CO<sub>2</sub>, CO, SO<sub>2</sub> fumes is possible.

**Protective equipment** : Use approved positive pressure self-contained breathing apparatus when product is involved in a fire.

**Further instructions** :Contaminated extinguishing water should be disposed of in a manner approved by the EEC, national and local regulatory agencies.

## 6. ACCIDENTAL RELEASE MEASURES

**Personal precautions** :Wear personal protective clothing. ( See paragraph 8 ).

When vapours, aerosols or mists are formed, wear suitable respiratory protection.

**Environmental precautions** :In case of an accident, avoid release of product into the environment. Prevent product getting into sewerage systems or public waterways. Try to collect as much as possible in an approved container for later disposal

**Methods for cleaning up** :Action may only be taken when fully protected. Contain the area of spillage. Stop the source of leak. Large amounts should be pumped into a container. Small amounts can be collected with absorbing materials. Small remaining leftovers may be washed away with large amounts of water

## 7. HANDLING AND STORAGE

**Handling** : Working areas and methods should be organised in such a way that direct contact is avoided.Wear protective clothing. Emergency shower and eye rinse facilities must be accessible. When handling chemicals, do not eat, drink or smoke.

**Fire and explosion prevention** :This preparation contains a lot of water and does not show any flammable or explosive properties. No special fire and explosion prevention procedures are necessary.

**Storage requirements** :Store in a dry cool, well ventilated place away from all sources of ignition and heating. Keep the package closed if not in use

**Other information** : Always store in the original container. Do not use the empty contaminated container for any other purposes

## 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

**Engineering controls** : Ensure good ventilation and local exhaustion of the working area.

**Exposure limits** :

**Personal protection** :

**Inhalation** : Normally a local ventilation is sufficient to keep airborne concentration of chemicals at a low level. No special breathing protection is necessary.

**Skin contact** : Wear impervious gloves.

**Eye contact** : Wear close fitting safety goggles.

**Ingestion** : When handling chemicals do not eat, drink or smoke.

**Other information** : Always follow the mixing instructions strictly when water or other solutions have to be added to the preparation. Avoid breathing mist or vapour. Avoid contact with eyes and skin. Handle with care.
