1. Product

Product Name: FUJI INSTANT COLOR FILM

2. Composition

This product consists of a cartridge containing ten sheets of instant film. Each film consists of a photosensitized sheet and an image reception sheet.

The photosensitized sheet is made of a polyethylene terephthalate backing and a laminate consisting of paper, plastic and photosensitized materials, like gelatine, halogenated silver and additives.

The image receiving sheet is made of a paper-polyethylene backing and a laminate consisting of gelatine and additives.

The processing chemical is contained in a pod, that is attached to the photosensitized sheet. The pod is made of a laminate of paper, vinyl chloride and aluminium.

The main ingredients are:

Main Ingredients:	Weight-%:
paper	45-50
polyethylene terephthalate	15-20
polyethylene	15-20
processing chemical	10-15
silver halides (unprocessed film)	1-5
gelatine	1-5

3. Health & Safety Hazards

If used as intended, this product does not have any special health or safety concerns.

Should you come into dermal contact with the processing chemical, e.g. by intentionally opening the film, rinse the affected area immediately and thoroughly with water. Should the processing chemical enter your mouth or eyes, it is recommended to seek medical attention after rinsing the affected area with water.

4. Fire Hazards and Fire Fighting Measures

This product is capable of burning, but will not ignite or flash under normal conditions.

Product / Main Ingredient(s):	Ignition Temp.	Flash Point	Density
product	n/av	n/av	n/av
paper	n/av	n/av	n/av

Combustion Gases:

Carbon dioxides, carbon monoxides, small amounts of nitrogen oxides and sulfur oxides can be generated depending upon the burning condition.

Fire Fighting Measures:

Water, carbon dioxide, extinguishing powder or foam can be used as an extinguishing media. While fire fighting, wear protective equipment such as self contained breathing apparatus, depending upon the fire situation.

5. Disposal Considerations

5.1 General Disposal Considerations

It is being recommended to separate the waste film from other waste streams and to provide it to a legitimate recycler.

5.2 Special Disposal Information for the US

6. Transport

This product is not subject to dangerous material classification and labelling pertaining to transportation and storage. In situations involving the transportation of silver containing waste film across international boundaries, applicable permissions and confirmations by pertinent authorities are required in accordance with the Basel Treaty and the OECD rules.

7. Storage

The product should be stored at a location that is out of reach of children. Specific hazards regarding storage are not known. For information on storage conditions please refer to the technical data sheets.

8. Further Information

For further information on the composition of this product or the disposal of unused material, please contact the distributor, as mentioned on the first page.

The content of this information sheet has been drawn up in accordance with current knowledge at the time when the sheet was issued. This Article Information Sheet provides information related to the environment and to safety and does not make any warranty about the properties or quality of the product. Furthermore, the precautions presented herein are postulated upon normal handling (the type of use originally intended by the manufacturer) of the product.
