ColorChecker Passport Photo 2

The new and more powerful ColorChecker Passport Photo 2 is the indispensable tool that helps you capture the colors of the world more perfectly and ensures that from initial capture to edit, you are beginning with the most accurate files possible.

ColorChecker Nano

The ColorChecker Classic target is an array of 24 scientifically formulated colors that has been the leading industry color reference target for more than 40 years.

1 x 1.75 in

ColorChecker Classic

The ColorChecker Classic is designed to deliver true-to-life color reproduction so photographers and filmmakers can predict and control how color will look under any illumination.

8.1 x 11.375 in.

ColorChecker Classic XL

Use the ColorChecker Classic XL to create custom camera and scanner profiles, color grade video footage or use as a visual reference.

21 x 14.75 in

ColorChecker Digital SG

Nothing optimizes the power of your digital camera or scanner like the ColorChecker® Digital SG (semi-gloss). It's the original ColorChecker 24 patch target plus an additional 116 patches to provide an even wider color gamut.

8.25 x 11 in.
